PULP AND PAPER

Vietnam September 2015

MINI AUDIT – DRYING PROCESS

- Group one - mapping:
  - How can the energy consumption be mapped?
    - Please draw
  - List alternatives ways of performing the energy mapping
  - Give examples of different energy services
  - What KPI can be generated, taking into consideration:
    - What is gained from the KPI
    - Who ”owns” the KPI
    - What actions should be taking if the KPI changes?

MINI AUDIT – DRYING PROCESS

- Group two - production:
  - What measures can be introduced?
  - What is the boundary conditions for each measure?
  - How should the measures be prioritized?
  - Who will be effected of by the measures?

MINI AUDIT – DRYING PROCESS

- Group Three – Utility (seam production):
  - Make a level two mapping of the utility systems.
  - List ways of improving the systems.
  - How should the measures be prioritized ?
  - What KPI can be generated, taking into consideration:
    - What is gained from the KPI
    - Who ”owns” the KPI
    - What actions should be taking if the KPI changes?
