About the Industrial Energy Efficiency program

Energistyrelsen

EE opportunities and barriers

How we support

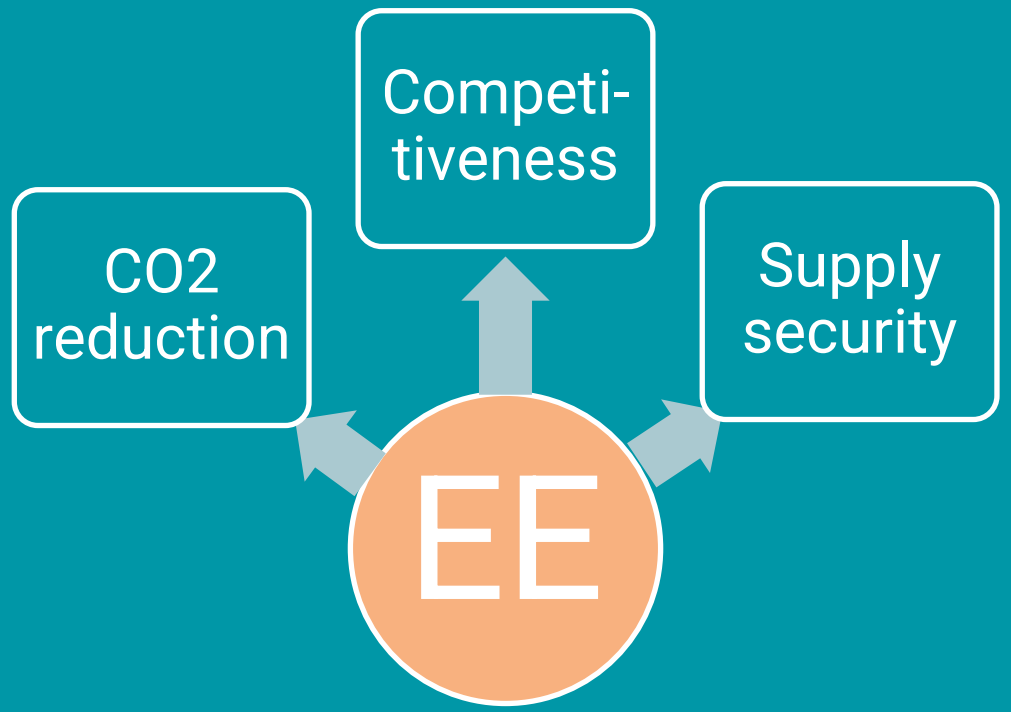

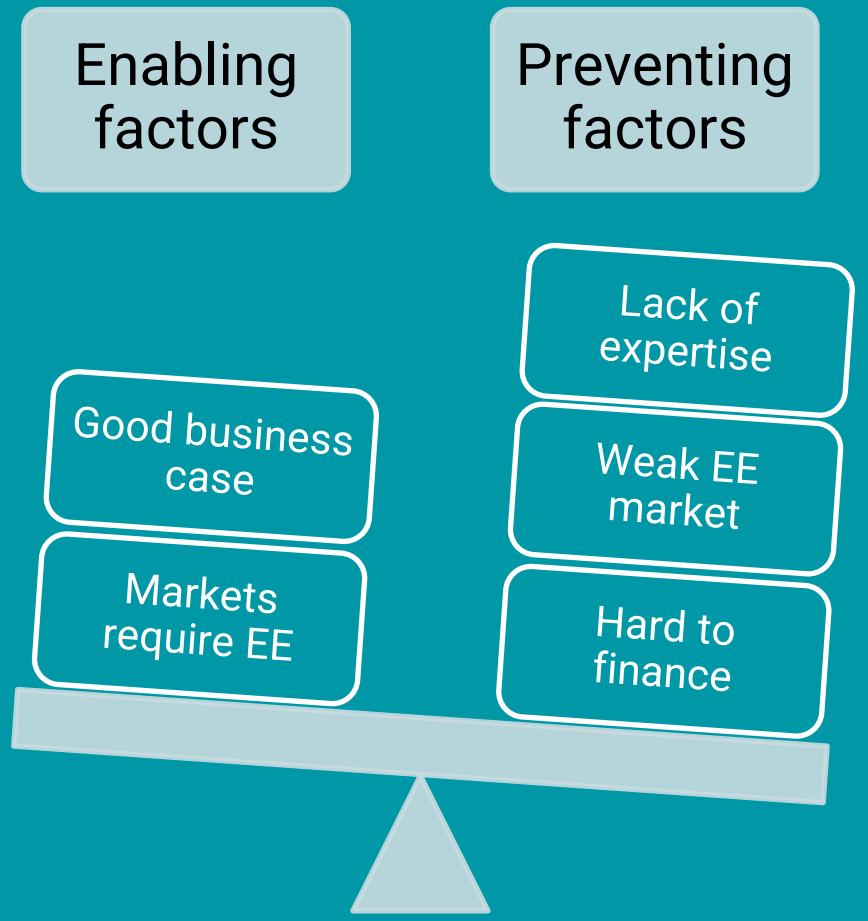

But What is VAS?

"The VAS is a program where energy-intensive companies voluntarily commit to implementing energy-saving measures in exchange for technical assistance, financial or regulatory benefits".

The VAS is about **technical assistance**

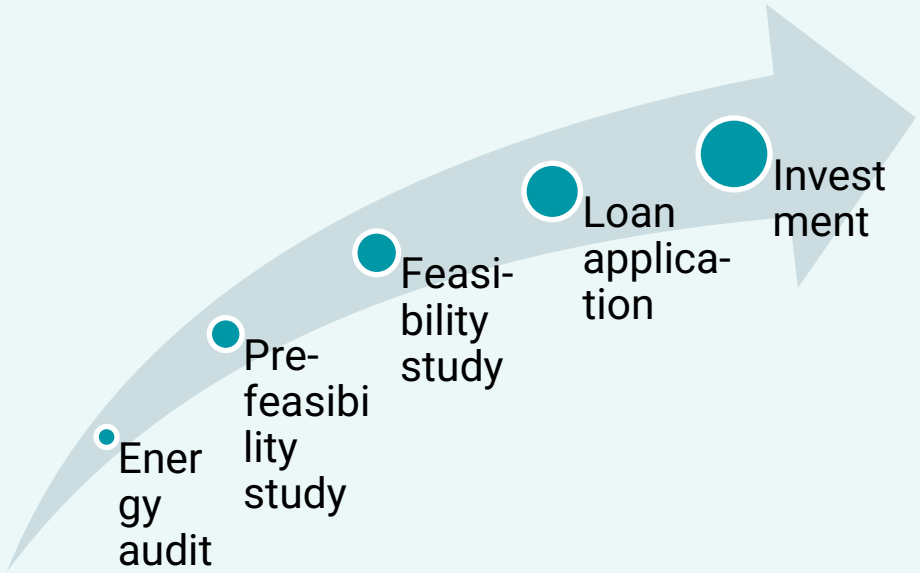

- EE and low carbon development benefits:

From energy audit to project implementation

- **Energy audits are useful for simple projects**
- **Large EE projects are complex and require detailed analysis, such as:**
  - **Technical feasibility**
  - **Financial feasibility**
  - **Non-energy benefits and risks**
- **More than 10 fully developed projects** (pre-fs and fs) expected

How does it work?

Sign agreement

Energy audit & Identify projects

Develop projects

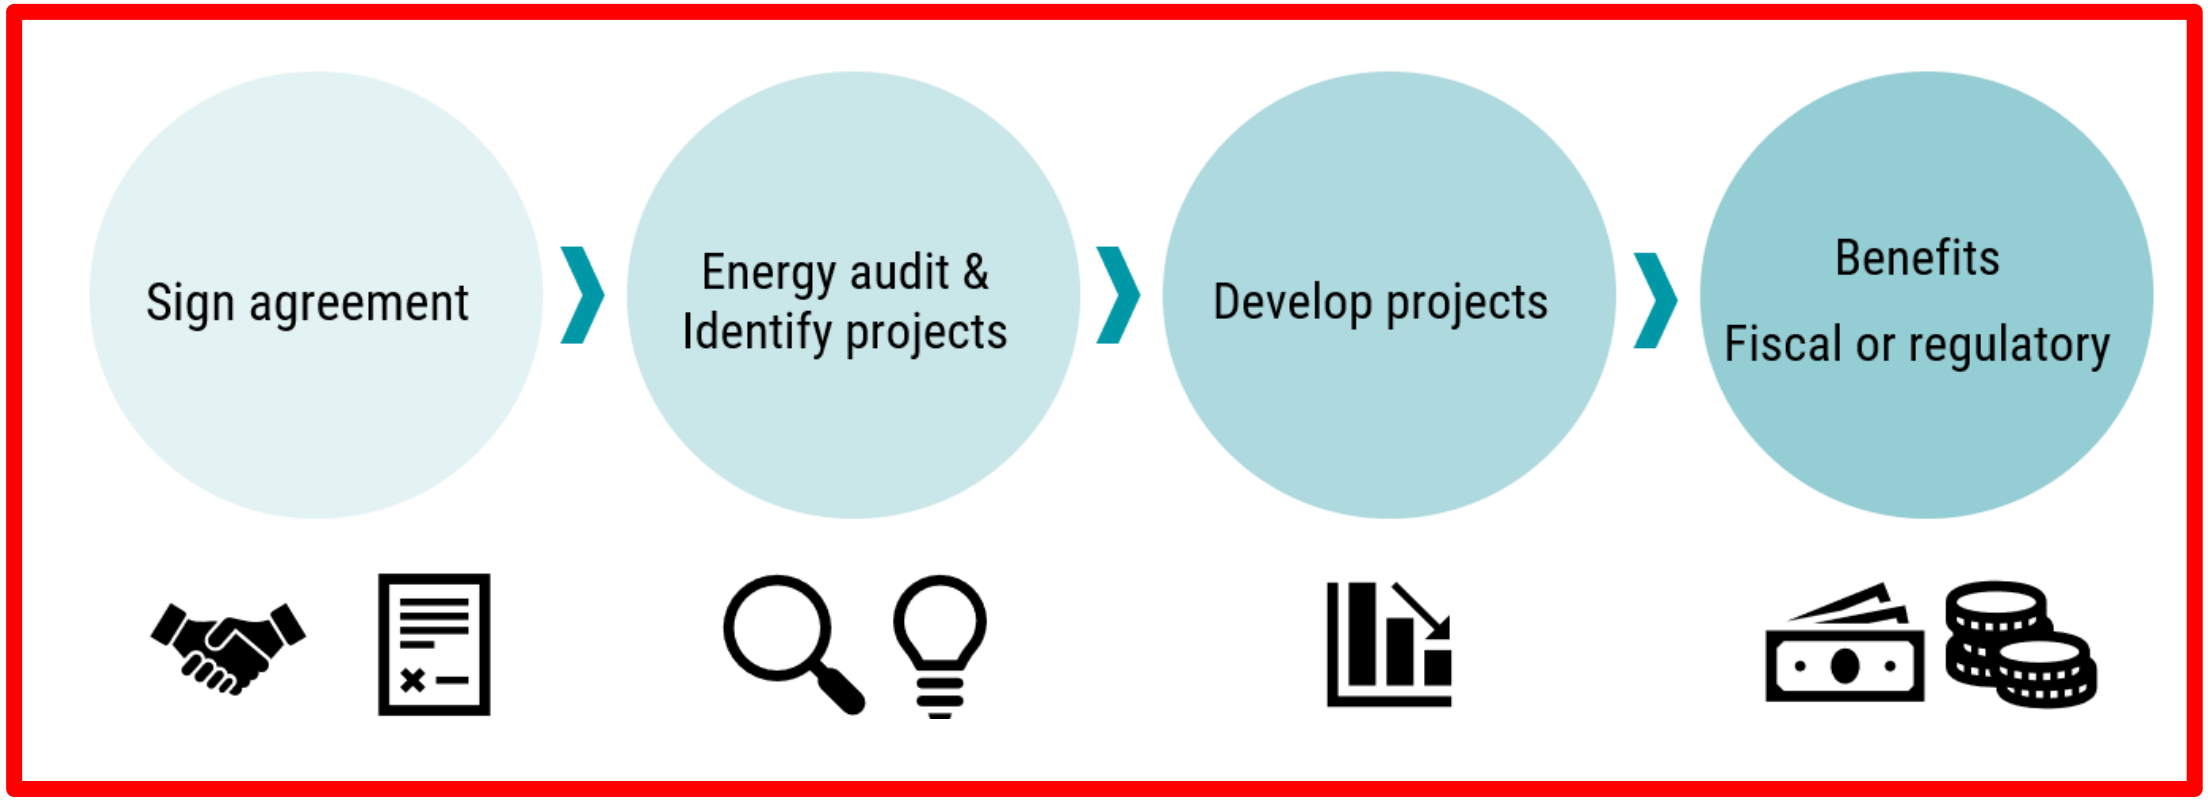

Benefits

Fiscal or regulatory

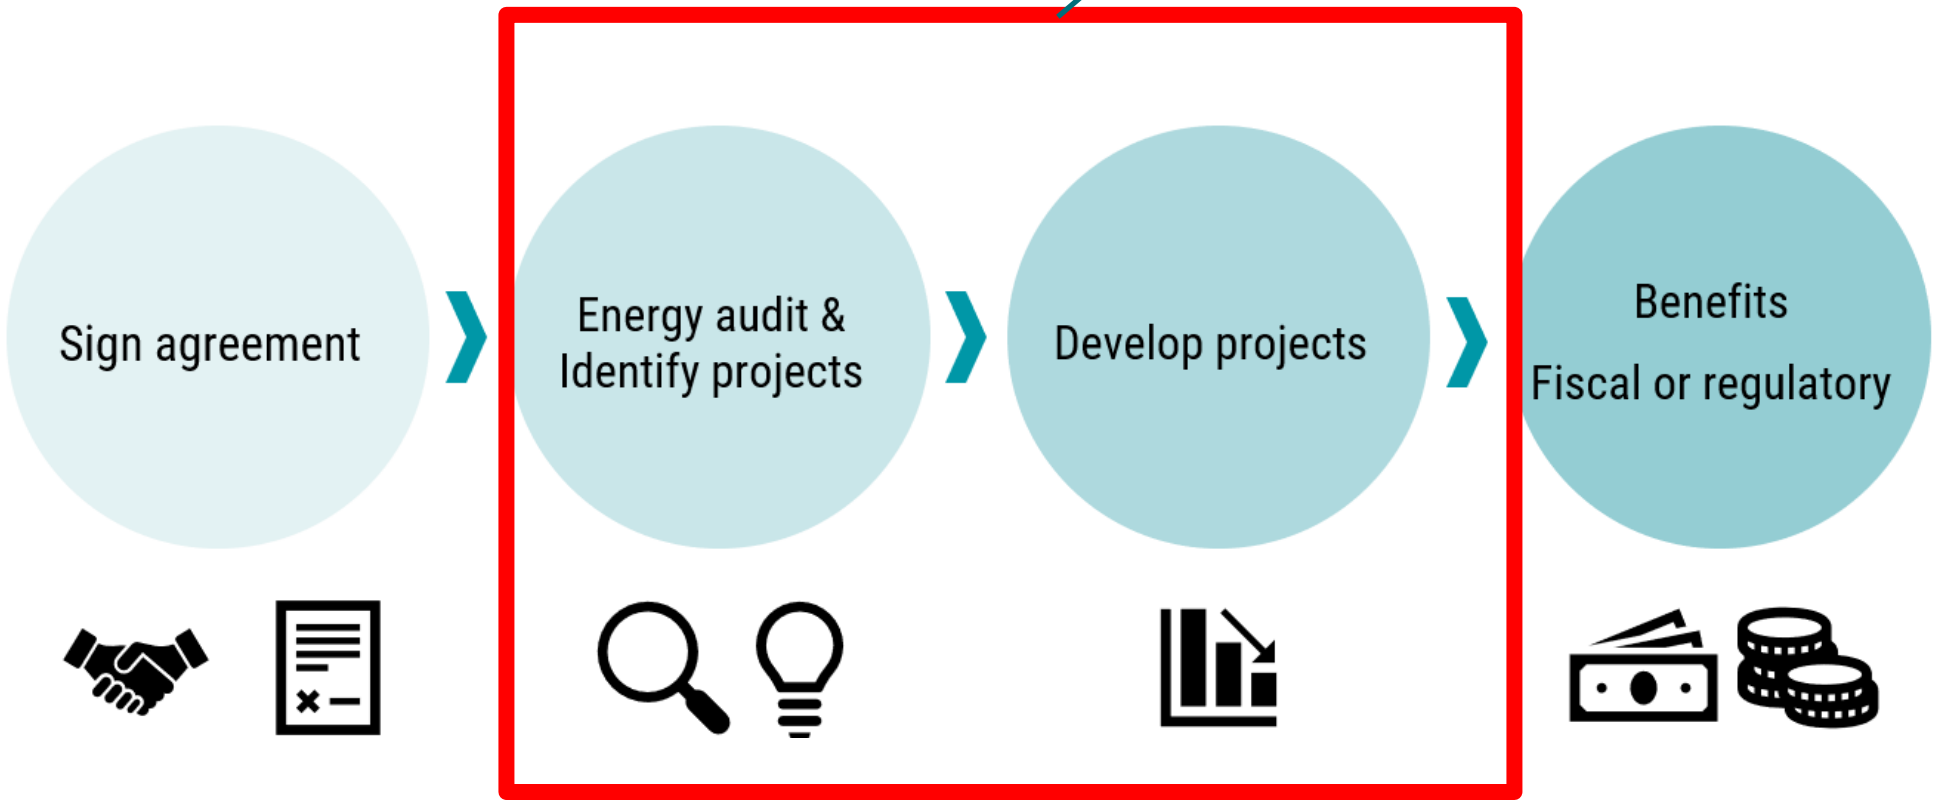

How we support

VAS, CoE

How we support

Regulations, TC TG, Bankable EE projects

Center of Excellence for energy efficiency

Administration of VAS	• Approve applications • Secure quality of reports
Disseminate EE material	• Website • Outreach activities
Capacity building	• Industrial managers • Energy service and hardware providers
